Who should attend the course?

Suitable for engineers and technicians who seek an intermediate level of training covering faultfinding and maintenance techniques for application on 'operational' PROFIBUS systems.

What does the course cover?

The course covers the practical use of a modern analyser and high-speed oscilloscope to fault-find and health check 'operational' PROFIBUS systems.

Qualifications to do the course?

The minimum requirement is that the Certified Installers Course has been completed successfully.

Andy Verwer

Principle - UK PROFIBUS International Competency Centre (PICC)

Until recently, Andy was Principal Lecturer at Manchester Metropolitan University teaching automation and control.

Andy Verwer has over 30 years of experience working and teaching within the automation and control industry. He is very active within the PROFIBUS International organisation and is a key member of the working groups for 'Training' and 'Installation'.

He has been providing Profibus training for over 15 years and this will be the fifth year that he returns to Australia to give training.
