Who should attend the course?

The course is designed for engineers and technicians who are involved in the planing and installation of fieldbus networks. No previous knowledge of fieldbus systems is required.

What does the course cover?

The course starts with the basics of PROFIBUS DP and PA transmission technologies, including RS485, IEC61158-2 and fibre optics; and teaches the layout, installation and testing of complete PROFIBUS networks.

Andy Verwer

Principle - UK PROFIBUS
International Competency
Centre (PICC)

Until recently, Andy was Principal Lecturer at Manchester Metropolitan University teaching automation and control.

The Certified PROFIBUS Installer Course was developed by Andy and he had a major contribution in the preparation of the PROFIBUS International installation and commissioning guide books.

He has been providing Certified Profibus training for over 15 years and this will be the fifth year that he returns to Australia to give training. Already over 150 local engineers have received Installer training.
